

Changing the world through play.

World Climate Game

World Climate Game
Together for a Sustainable Future

The World Climate Game is an interactive simulation game about climate action, the global economy, and societal change.

Participants experience how decisions made today shape the world of tomorrow.

For schools, colleges, communities, businesses, and other organizations.

2020

The world is at a turning point. Instead of cooperation, short-term self-interest and polarization dominate.

The World Climate Game

The World Climate Game is an interactive simulation game featuring an oversized **game board** consisting of over 1,000 pieces, all supported by a **digital simulation**.

The game was developed by Weitblick GmbH in collaboration with experts in climate science, education, and psychology. It is based on the IPCC reports (Intergovernmental Panel on Climate Change) and the UN Sustainable Development Goals (SDGs).

The World Climate Game supports the development of life skills such as empathy, cooperation, and systems thinking, as well as the implementation of the Inner Development Goals (IDGs).

The World Climate Game offers a space where (young) people learn how to:

Observe and make meaning of complexity

Adopt different perspectives

Take responsibility for the future

Develop solutions cooperatively

Who is the World Climate Game for?

Schools & vocational schools

(ages 13+)

For a transformative learning experience directly linked to the curriculum.

NGOs, associations & initiatives

To strengthen community engagement, promote climate awareness, and develop sustainable action strategies.

Communities & citizen-led processes

For the participatory involvement of diverse stakeholders in future-oriented and transformational processes.

Companies

In particular, as part of apprenticeship training to strengthen future-oriented skills and resource-efficient practices.

Colleges & universities

For the integration of experiential learning methods into future-oriented courses.

The game teaches:

Skills

&

Contents

Communication
& Empathy

Democracy
& Social Justice

Problem-solving
& Decision-making

Global Economy
& Supply Chains

Self-Perception
& Tolerance for Ambiguity

Global Connections
& Understanding of Systems

Responsibility
& Values

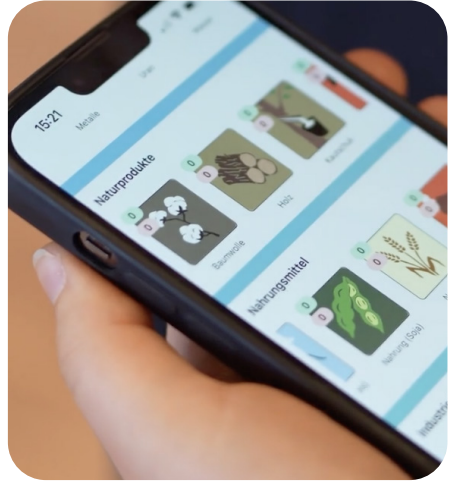

Climate, Environmental
Protection & Biodiversity

The **game** consists of:

A large game board

Game board (1.5 x 1.5 m)
comprising 1000+ pieces

A digital simulation

Digital simulation using
real-time game data

Simply a
super-cool
gaming
experience—
not to mention
the transfer of
content and skills
while playing.

3.

Or train
to become
a game
facilitator

Become an official
cooperation partner

About **Weitblick** GmbH

We are convinced that inner transformation is an essential lever for social change.

Weitblick is committed to a future worth living: one that is ecologically regenerative, socially just, economically viable, and digitally humanistic. We are convinced that social change can begin with inner development. That is why we promote life skills education: to empower people as active agents of change. Through innovative learning formats, collaborative learning experiences, and strong partnerships, we foster individual development and collective impact - grounded, cooperative, and meaningful.
